Minneapolis, MN ▪ barke345@umn.edu ▪ linkedin.com/in/aaronbarke

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java, JavaScript, TypeScript, SQL

**Frameworks & Tools:** React, Next.js, FastAPI, n8n, Docker, Git/GitHub

**APIs & Platforms:** HubSpot, Apollo, OpenAI API, Anthropic API, Microsoft Graph, Azure Entra

**Data:** PostgreSQL, Redis, Google Sheets

## WORK EXPERIENCE

---

### AI Automation Engineer (Contract)

Apr 2026 – Present

*Walnut Insurance*

*Remote*

- Designed and built an end-to-end automated outbound sales pipeline as the sole engineer, integrating Apollo, HubSpot, OpenAI, and Microsoft Graph APIs
- Built an LLM-based lead qualification system with tiered classification logic, iterating on prompt design with stakeholders against real production data
- Integrated CRM, email, and messaging systems with deduplication, audit logging, and scheduled automation across HubSpot, Outlook, Slack, and Google Sheets
- Coordinated across executive, product, and IT stakeholders to scope requirements, resolve technical blockers, and deploy to a SOC 2-restricted production environment

### AI LLM Tooling Intern

May 2025 – Apr 2026

*GenesisX*

*Remote*

- Automated Google Ads reporting workflows, extracting demographic and campaign keyword data into Google Sheets for visualization
- Created AI-driven video and content assets using Runway and MidJourney to support marketing campaigns and commercial projects
- Collaborated with marketing and technical teams to streamline workflows and enhance creative output

## PROJECTS

---

### Fantasy Football AI Assistant Project

2026

- Building a full-stack fantasy football assistant with a Next.js/TypeScript frontend and Python FastAPI backend, using PostgreSQL and Redis
- Integrating Sleeper, ESPN, and Yahoo fantasy APIs alongside NFL data pipelines (nfl\_data\_py/nflverse)
- Using an LLM as a reasoning layer to answer natural-language queries grounded in live league data

### Fortnite Map Development (UEFN)

Nov 2023 – Jun 2025

- Co-developed multiple published Fortnite maps with a two-person team, reaching 1.2M+ total players
- Built game mechanics and interactive systems using Verse coding in Unreal Editor for Fortnite
- Iterated on design based on playtesting and analytics; managed monetization and creator economy integration

### Generative AI and Student Learning: Ethical and Cognitive Impacts

Sep – Dec 2024

*University of Minnesota, WRIT 1301*

- Interviewed a UMN professor on generative AI's influence on higher education and authored a published article exploring its impact on student learning and educational policy (Both.org)

## EDUCATION

---

### University of Minnesota, College of Science and Engineering

Expected May 2028

*Bachelor of Science, Computer Science*

- GPA: 3.26 / 4.00
